Summary

Supply Chain & Operations Analyst with 4+ years of experience in logistics, warehouse operations, and process improvement across global supply chain environments. Skilled in data analysis (SQL, Excel), root cause analysis, and implementing process improvements to enhance efficiency, inventory accuracy, and operational performance. Experienced in vendor management, KPI tracking, and cross-functional collaboration to drive cost reduction and service excellence. Strong understanding of Lean principles, SOP development, and data-driven decision-making.

Skills

Supply Chain & Operations: Supply Chain Optimization, Warehouse Operations, Demand Planning, Production Scheduling, Inventory Control, Procurement & Supplier Coordination, Logistics & Distribution Management, S&OP, Vendor Relationship Management, Cost Reduction, Root Cause Analysis

Business & Decision Support: KPI Tracking & Performance Metrics, Forecasting & Trend Analysis, Scenario Planning, Budgeting & Resource Allocation, Operational Reporting, Business Process Standardization, Continuous Improvement, Compliance & Policy Adherence

Tools & Applications: SQL (data extraction & analysis), Microsoft Excel (PivotTables, VLOOKUP, Macros), SAP ERP (MM, SD, PP, SCM), Power BI, Microsoft Access, MS Project, JIRA, Trello, Minitab, PowerPoint, Word

Cross-Functional & Strategic: Analytical Thinking, Data-Driven Decision Making, Supply Chain Risk Management, Strategic Sourcing, Lean Methodologies, Agile & Scrum, Project Coordination, Change Management, Stakeholder Engagement

Professional Experience

Business Analyst & Supply Chain Operations | Cloud Planning

Oct 2025 – Present

Microsoft (Contract) | Redmond, WA

- Analyzed large-scale supply chain and cloud capacity datasets to support AI GPU demand planning, identifying capacity risks, utilization gaps, and optimization opportunities across regions.
- Extracted and analyzed data using SQL and Excel to support root cause analysis, enabling data-driven decision-making and improving process cycle time and execution reliability.
- Developed dashboards, reports, and executive-ready presentations to communicate trends, risks, and recommendations to leadership, supporting prioritization and rapid iteration.
- Monitored key operational KPIs (capacity utilization, demand variance, fulfillment timelines) and surfaced early signals of business trends impacting AI infrastructure scalability.
- Supported ad-hoc analytical projects related to new planning processes and policy changes, assessing downstream impact on supply chain execution and platform reliability.

Supply Chain Analyst

Jun 2020 – Jul 2023

Mahindra Logistics | Pune, MH

- Conducted supply chain analysis across warehouse and distribution operations, improving forecast accuracy by 15% and reducing stockouts through SKU-level performance tracking across 7 fulfillment centers.
- Performed root cause analysis on logistics delays and operational inefficiencies, enabling 12% faster resolution and improved delivery timelines.
- Led vendor performance management for 25+ suppliers — developed scorecards, tracked KPIs, and drove 20% improvement in service levels through structured reviews and corrective actions.
- Conducted cost and process analysis across transportation and distribution, reducing cost per unit by 11% and streamlining reporting by integrating data from 10+ sources.
- Documented workflows and supported SOP standardization across logistics operations, improving process consistency and team-wide compliance.

Project

Master Data Signal Integrity Validation | [GitHub Link](#)

Oct 2025 – Present

Microsoft — Cloud Planning & Supply Chain Operations

- Designed a multi-layer SQL validation framework (6 layers: null checks, duplicates, domain validation, date gaps, referential integrity) to audit cloud capacity master data feeding AI GPU demand planning.
- Built an automated audit log pipeline tracking open issues by flag type, with resolution rate and trend monitoring used in Power BI dashboards and executive briefings.
- Identified stale and duplicate signals skewing demand variance metrics, directly improving capacity forecast accuracy across regions.

Tools: SQL (TSQL / Azure Synapse) · Power BI · Excel

Vendor Performance Scorecard & Logistics KPI Tracker | [GitHub Link](#)

Aug 2020 – Nov 2020

Mahindra Logistics — Supply Chain Analytics

- Developed a vendor scorecard system to track and compare performance across 25+ suppliers and 7 fulfillment centers, replacing a manual reporting process that pulled from 10+ disconnected data sources.
- Established KPI tracking across delivery timeliness, order fill rate, billing accuracy, and damage rates — tiering vendors into performance categories that drove structured quarterly reviews and corrective action plans.
- Identified root causes of recurring delivery delays and short-shipments by vendor and region, contributing to a 20% improvement in supplier service levels and an 11% reduction in cost per unit.

Tools: Python · Excel · SAP ERP (MM/SD/SCM)

Education

Master of Science — Engineering Management / Industrial Management

Aug 2023 – May 2025

California State University CA, USA

Bachelor of Engineering — Mechanical Engineering

Jun 2018 – Apr 2021

Savitribai Phule Pune University Pune, India
